

UNIVERSAL SOLAR HEATER

Connecting Multiple Units

IMPORTANT CHANGES TO THE SET UP INSTRUCTIONS

Dear GAME Customer,

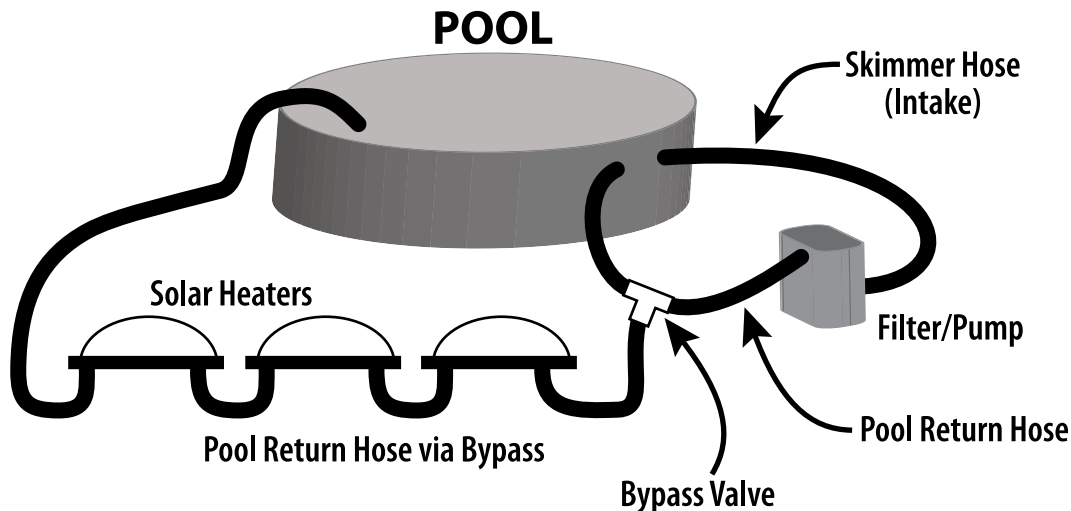

Thank you for purchasing our NEW Universal Solar Heater.

We are sure you will be pleased with the performance of this revolutionary new means of increasing the water temperature in your swimming pool. Your Solar Heater uses the FREE energy from the sun to make your swimming pool water more enjoyable.

Please note that there is a change to the Owner's Manual regarding the installation of multiple units in sequence. On page 8 of the manual there is a reference to linking multiple solar heaters together which are installed directly between the filter tank and the pool return fitting on the pool wall. **DO NOT FOLLOW THESE INSTRUCTIONS AS DAMAGE IS LIKELY TO OCCUR TO ONE OR MORE OF YOUR SOLAR HEATERS.**

DO NOT install multiple units directly into the return line. If you are planning on linking multiple units together, **you MUST use a bypass valve** and pool hoses that do not connect into a return fitting on the wall of your swimming pool. The pool hose for a multiple unit installation **MUST** be at least 1½" diameter and be placed over the wall directly into the water **NOT** through the wall return fitting. The bypass valve and additional hoses are available from your local swimming pool specialty retailer.

If you wish further information regarding the installation of multiple Solar Heater units on your swimming pool, please contact our customer service department or see you local swimming pool specialist.
