

ARMOR SHIELD™

Protection System

Armor Shield provides an important protective layer between a vinyl swimming pool liner and its sand or soil base. Unlike traditional foam padding, Armor Shield is a Polypropylene Geotextile material that prevents cuts and punctures to the vinyl liner caused by rocks, roots, grass and even GLASS! Armor Shield also reduces convective heat loss and provides a comfortable floor pad for tired feet.

OUR PROGRAM

WE ARE SO CERTAIN of the protection Armor Shield will provide, we will extend the warranty of your INYO Above Ground Liner from 1 year full to 3 years full when installed with Armor Shield.

Should you experience a problem with your liner as a result of a manufacturing defect, our manufacturer will replace or repair your liner within your first 3 years of ownership.

pol•y•pro•pyl•ene - noun *Chemistry*

A plastic polymer of propylene, (C₃H₅), used chiefly for molded parts, electrical insulation, packaging, and fibers for wearing apparel.

GEOTEXTILES are permeable fabrics which, when used in association with soil, have the ability to separate, filter, reinforce, protect, or drain.

GEOTEXTILES have a wide range of applications, many of which are currently used to the advantage of civil engineering projects including; roads, airfields, railroads, embankments, retaining structures, reservoirs, canals, etc.
