

Levolor®

Electronic Water Leveler

Model K-1100

INSTALLATION INSTRUCTIONS

Levolor is the alternative choice of contractors over mechanical floats; because it's trouble-free, easy to install and there are no moving parts. LEVOLOR is a computer-controlled device that detects a low water condition and automatically replaces the water to a pre-set level. LEVELOR works well on new and existing pools and spas. LEVELOR can be used in any situation where a consistent liquid level is desired (i.e., pools, spas, aquariums, ponds, reservoirs, storage tanks, water cooling towers, etc.).

IMPORTANT SAFETY INSTRUCTIONS

1. READ AND FOLLOW ALL INSTRUCTIONS.
2. WARNING: To reduce the risk of injury, do not permit children to use this product unless they are closely supervised at all times.
3. SAVE THESE INSTRUCTIONS.
4. Sensor wires must be continuous and not spliced.
Call factory with any questions: 1-800- 844-8514
5. Solder all low voltage wire connections when possible and always use grease-filled wire nuts on low voltage connections.
