This product is a blend of cleaning agents and degreasers especially formulated to penetrate deeply into any reusable cartridge filter or D.E. element and remove the accumulated materials such as body oil, grease, dirt, and soap scum. By so doing, the cartridge is thoroughly cleaned and renewed, allowing it to be used again. Clean the filter cartridge every few weeks or at least every time you change the water, depending upon the bathing load.

### DIRECTIONS

Filter cartridge should be cleaned when it indicates being blocked or dirty by a decrease in the flow rate. Stop filter and remove cartridge. Make a solution of 4 oz. of this product to 1 gallon of water in a 5 gallon plastic pail or a small trash can. Enough solution should be made to cover the cartridges. Place cartridge upright in solution and allow to soak for several hours or overnight. Remove cartridge and rinse thoroughly with hose.

**Replace cartridge and resume filtration.**

### CAUTION: ALKALINE SOLUTION KEEP OUT OF REACH OF CHILDREN

Can cause eye irritation. Avoid contact with skin or eyes. In case of contact, immediately flush skin or eyes with plenty of water for at least 15 minutes. For eyes get medical attention.
