

**MODEL AFS10 A-FRAME STABILIZER**  
**(USED EXCLUSIVELY WITH MODEL SLA001 A-FRAME LADDER)**  
**FEATURES & SPECIFICATIONS**

- Vinyl Works Canada manufactures this optional kit to meet or exceed NSPI/BOCA/ANSI requirements for above ground/onground pool ladders
- The Model AFS10 is manufactured using maintenance free resins with stainless steel hardware (except tubular braces)
- The unit is designed exclusively for use with our Model SLA001 “Slide-Lock” A-Frame Ladder
- This optional package is required / recommended when you are not able to attach our Model SLA001 A-Frame Ladder to the top rail of your pool. This A-Frame Stabilizer is designed for use with soft-sided or inflatable pools where attachment to the top rail/ring of pool cannot be done
- The Model AFS10 is packaged in one carton to include: base tread extensions (2 – identical), tubular support braces (2 – identical) and all required hardware and instruction sheet
- When installed properly, as per instructions packaged within, the stabilizer will help balance and make exit/entry to the pool safer
- Vinyl Works Canada encourages customer inquiries – ANY QUESTIONS, COMMENTS OR CONCERNS ? Call toll free 877-846-9595

**PLEASE REMEMBER ! ALWAYS SWIM SAFELY !**
