

# Installation Instructions – STS

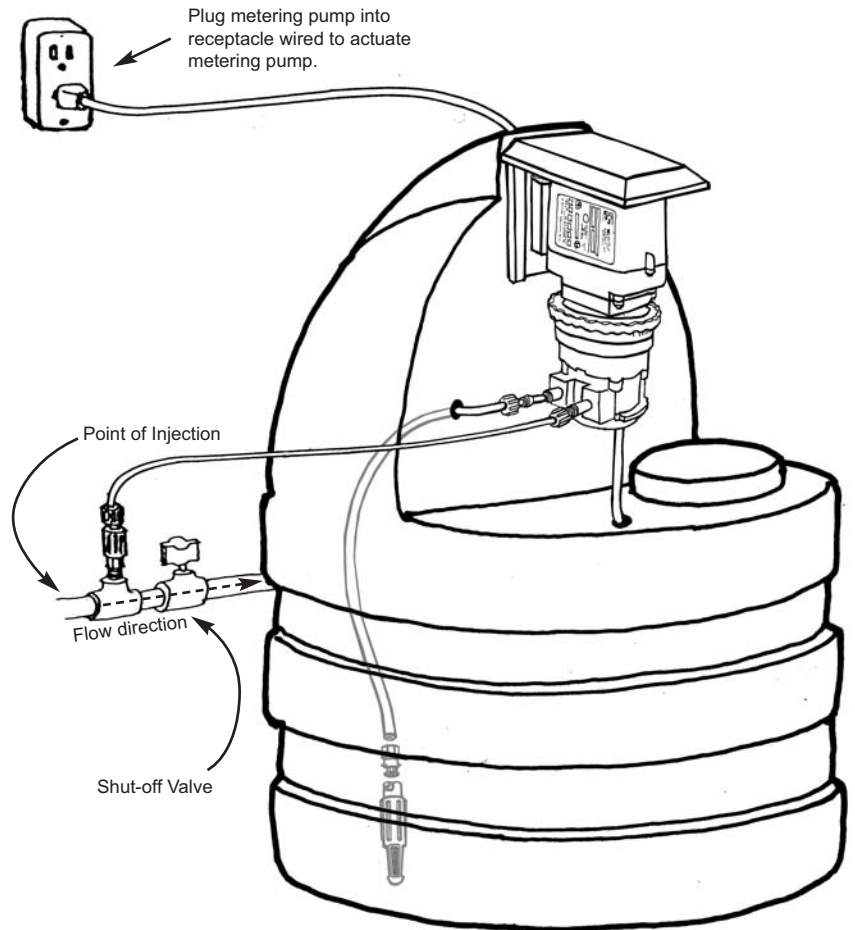

BEFORE STARTING THE INSTALLATION, PLEASE BE SURE TO READ ALL SAFETY INFORMATION FROM STENNER INSTALLATION AND MAINTENANCE MANUAL.

**NOTE**  
Additional information:

The STS Tank System comes with 4 screws installed into each side of the mounting bracket to prevent shipping damage. Please remove these fasteners upon installation so that the pump may be removed from the mounting bracket when required.

Refer to the Installation & Maintenance Manual for the metering pump included with all tank systems for more information regarding the proper installation and care of your new chemical metering pump.

1. Install the injector into the pipe or fitting.
2. Install the discharge tubing from the discharge side of the pump head to the injection point.
4. Connect the power cord to the proper pump control circuit.
5. Fill the tank with the solution and securely tighten the locking cap.
6. Prime the metering pump and perform final adjustments.
