

Hasslefree Kit™ Instructions

Directions for use:

Pool Magic™+Phosfree®

Sanitizer level should be below 5ppm before adding this product.

New pools, openings, & initial phosphate removal:

1. Follow dealer instructions to fill (if new pool) and balance water chemistry.
2. Shake well and use entire bottle for pools up to 25,000 gallons by adding to the skimmer with the circulation system running.

Note: Do not backwash/clean the filter for 48 hours after adding this product.

At closing: 1. Add product to a properly balanced pool (with sanitizer level below 5ppm) at a rate of 1 bottle per 25,000 gallons. 2. For same day closing, product can be added to the pool water evenly around the edges.

Note: This product removes 300ppb of phosphates from 20,000 gallons.

For opening: Test phosphate levels weekly and treat as necessary in order to maintain phosphate levels 100ppb or lower.

For closing: Phosphate levels should be 100ppb or lower for optimal results.

Metalfree™

This product is designed for use in properly balanced pool water.

Initial Dose: Add 1 bottle (33.9oz) per 20,000 gallons to the pool water evenly around the edge.

Weekly Maintenance Dose: Each week, add 1 capful (4 oz) per 10,000 gallons to the pool water evenly around the edge.

Note: Take caution to not spill or splash **Metalfree** on deck or coping. **Do not use with biguanides.**
