

Please use these instructions to change the salt readings from Metric to PPM on your salt system found under “Salt Display” on page 13 in your manual. If you have any further questions, please do not hesitate to call one of our customer service representatives.

Salt Display

The Salt Display shows the current salt concentration of the pool water. Readings are currently in Metric (grams per Liter). If you prefer PPM (parts per million), push the “Diagnostic Button” next to the display 5 times. The display will now show the instant salt readings in Metric. While the salt reading displayed, move the main switch from AUTO to SUPER CHLORINATE to AUTO. The display will instantly change to PPM.

Corresponding Cell Sizes

PL7701	F3	20,000 gallons
PL7700	F15	40,000 gallons
PL7703	T15	60,000 gallons
