**Easy-Clear™** full-flo element filters are designed specifically for above-ground pools of all sizes. Manufactured from high density ABS materials, Easy-Clear will provide years of trouble-free operation. Performance-matched with the Power-Flo LX™ pump series, they will turn over up to 33,600 gallons in an eight hour period, easily handling a 24' round above-ground pool. Easy-Clear filters are mounted on a rugged filter base and use a special reinforced polyester cartridge engineered to provide superior water clarity with minimal care.

**Applications**

- Above-ground pools

**Features**

- Easy-Lok™ ring design provides simple entry to service the cartridge element
- Built-in check valve prevents accidental loss of pool water when cartridge is being removed for cleaning
- Unique safety-catch prevents overtightening of the cover and unwanted entry into the filter
- Cartridge element is uniquely designed by Hayward of high quality reinforced polyester and a molded center core for easy cleaning, high flows and long life.
- Union connection allows pump or filter to be removed quickly and easily for servicing systems
