Enduraliner™ Measuring Form
For Custom In-Ground Pool Liners

Pool Owner Name _________________________________________
Address ________________________________________________
City _________________________ St ________ Zip __________
Phone _______________________ Fax ______________________
E-Mail Address ___________________________________________

Your Signature ___________________________________________
Your signature indicates that you have verified your measurements and that the information you have
provided is correct. Your new vinyl liner will be made to these specifications once you place your order.
(Orders cannot be processed without your signature)

1 LINER PATTERN
Pattern Name: _________________________________________
Mil (check one): 20mil 28mil

2 CORNER TYPE
Check your corner type below & enter measurements where required:
Cut Corner Point 1 to Point 2: __________
90 Degree Corner No measurements required for
square corners.
Radius/Rounded Corner Imaginary Lines Point 1 to Point 2: __________

3 LINER TYPE
Beaded
Low Hung Beaded
Overlap How many inches of liner
do you need for the overlap? __________

If you selected “Beaded” or “Low Hung Beaded,” please also indicate below if your liner is a
Standard or Reverse bead:
Standard Bead “Lip” of
Receiver is on the bottom
Reverse Bead “Lip” of
Receiver is on the top

4 HOPPER TYPE
Check one & fill in measurements on the form to the right:
A. Standard Hopper
B. Wedge Hopper
C. Constant Slope Hopper
D. Safety Ledge Hopper

Fill in all measurements that apply
to your hopper type:
C __________ ft __________ in
C1 __________ ft __________ in
D __________ ft __________ in
E __________ ft __________ in
F __________ ft __________ In
G __________ ft __________ in
H __________ ft __________ in
H1 __________ ft __________ in
I __________ ft __________ in
J __________ ft __________ in

Are you measuring the bottom of your pool correctly?
Be sure you are NOT measuring the slopes when taking horizontal bottom measurements. We only use
measurements parallel to the deck. See the diagrams below for the correct way to measure a coved bottom.

RIGHT

WRONG
POOL SHAPE

Check one & fill in the measurements below:

NOTE: Diagonal measurements must be taken to imaginary squared off corners of your pool if you have radius or cutoff corners. (i.e. diagonal measurement Q & R on the rectangular pool)

Dimensions: Please transfer all of the measurements you have taken into the appropriate spaces below. NOTE: you may not use all the letters below, depending on your pool shape.

- Rectangular

- True “L” Left

- True “L” Right

- Contour Bottom Grecian

- Square Bottom Grecian

- Oval with Parallel Sides

C (Corner Type) Applies to True “L” Left & Right ONLY:

- Cut Corner

- 90 Degree Corner

- Radius/Rounded Corner

VINYL COVERED STEPS

Please check one:

- Fiberglass (No Further Measurements Needed)

- Vinyl Covered (Fill Out the Section on Pg. 3)

- No Steps
What is the Step Position?
Please circle the position that best describes the location of your step and provide measurements (Y) and (A).

Record Measurements (Y) & (A) below:
Y = __________ ft __________ in
A = __________ ft __________ in

Top Step Corners
☑️ Square
☑️ Radius __________ in
☑️ Diagonal __________ in

Rod Pockets
☑️ Yes ☐ No
Size __________________ (Diameter of Rod)

Nailer Flaps
☑️ Yes ☐ No

Step Setback
☐ Yes ☑ No
If yes, see below
Setback width (K) __________ in

☐ Straight ☑ Angled (L) __________ in

HELPFUL HINTS

Measuring the pool bottom without entering the pool:
You will be able to make horizontal measurements of your pool bottom without entering the pool. Taking these measurements is easier than you may think, when you use this easy-to-make measuring tool.

You will need:
1. A long straight pole (telepole) — “fishing pole”
2. String attached to one end of the pole
3. Some sort of weight tied to the other end of the string
4. A measuring tape

Follow the instructions below, using your fishing pole, to make these measurements.

Horizontal Bottom Measurements: Use your “fishing pole” to “fish” for a point on the bottom of the pool. With the pole to the ends of the pool and the string vertical (allow no slack in the string), measure the distance from the edge of the pool (water’s edge) to the end of the pole where string is attached. You should “fish” for points that will achieve the desired measurements based on the bottom contour of your pool (pictured on page 1). For example, to take measurement (H), you would stand on one side of the pool, and “fish” for a corner of the Hopper. You would then measure the distance from the edge of the pool (water’s edge) to the end of the pole where the string is attached.

Depth measurements: When taking the depth measurements (C) and (J), be sure to measure from the bottom of the pool floor to the bead receiver (for beaded liners) OR to the board where the liner is nailed or stapled (for overlap liners). Do not measure to the top of the pool if you have a bead receiver, your measurement will be incorrect.
