

12 VOLT IN-POOL LIGHT (Model OPT12V)

IMPORTANT SAFETY & INSTALLATION INFORMATION

- This product meets or exceeds applicable standards established by Underwriters Laboratories (UL listed) - see back page, Details 5.1 - 5.3
- Install to / plug into only a 110V receptacle protected by a ground fault circuit interrupter (GFCI). The GFCI should be enclosed and weatherproof and at least 1 foot above ground surface
- Always remove plug from receptacle before installing, winterizing or servicing light
- **DO NOT USE EXTENSION CORDS - DEATH OR INJURY CAN RESULT**
- This product is designed and intended for use as an underwater light in an above-ground pool; never modify or use for any other purpose, serious injury can result
- Light fixture **MUST** be submerged in water before plugging in / illuminating

1. Before starting installation of light, remove ladder or step from pool (if assembled / installed already). Fit cord of light through light bracket, front to back (Detail 1.1 - 1.2). The bracket has two small notches (Detail 1.3 - 1.4), the cord fits into a notch when pressing the light into the bracket. Press light to fit into bracket completely; to the back of the bracket (Detail 1.5)

2. Insert light & bracket into ladder or stair system. Both units have a molded hole that will require to be trimmed out (Detail 1.1 - 1.2). With a utility knife, trim hole gentle around seam to remove plastic center leaving a smooth edge. Insert light and bracket into the trimmed hole. Align holes in bracket with screw marks in ladder or step (Detail 2.3). Drill a 1/8" hole and secure bracket & light in place using the stainless screws provided (Detail 2.4). Make certain light is secure. Pass cord up behind ladder or step, over pool top rail, and to GFI receptacle. Make sure cord is secure and neatly tucked out of the way as not to interfere with traffic in or around the pool (Detail 2.5).

3. Note proper placement of light in steps. The steps have four risers; the light should be placed in the second riser down from the top.

Pivot light up or down if desired

LIGHT FIXTURE MUST BE SUBMERGED IN WATER BEFORE PLUGGING INTO RECEPTACLE

GFCI

4. Insert light cord into transformer & thread tight (Detail 4.1). The transformer plug **MUST** be plugged into a 110V GFCI receptacle (see above safety information). **NEVER USE AN EXTENSION CORD.** The receptacle must be enclosed & weatherproof & at least 1 foot above ground surface
