

It's no longer an open and shut case...

...because Sani-King® has a wide range of adjustments.

With a simple twist of the cap, you set Sani-King® 740/760 to release precisely the right amount of sanitizing chemical into your **spa or hot tub**... whether it holds 80 gallons or 700 gallons. You set Sani-King® once when you install it and then forget it!

**ACCURATE...AUTOMATIC...
ADJUSTABLE...EASY TO USE...**

A twist of the cap lowers chemical into the flow-way . . . just the right amount for any spa or hot tub.

Sani-King® is the **only automatic chemical feeder** designed especially for **spas and hot tubs**. Spa sanitation doesn't get any easier!

SANI-KING® 700 SERIES

five great reasons why...

REASON 1

It's accurate and automatic! Set it and forget it. The SANI-KING® responds to the special conditions of your spa or hot tub. After establishing the correct setting, all you have to do is add more bromine. Lasts up to 30 days.

REASON 2

It's adjustable for a wide range of spa or hot tub sizes! The calibrations on the SANI-KING® make it possible to use on virtually any size spa or hot tub — from 80 to 700 gallons. It releases the precise amount of chemical 24 hours a day.

REASON 3

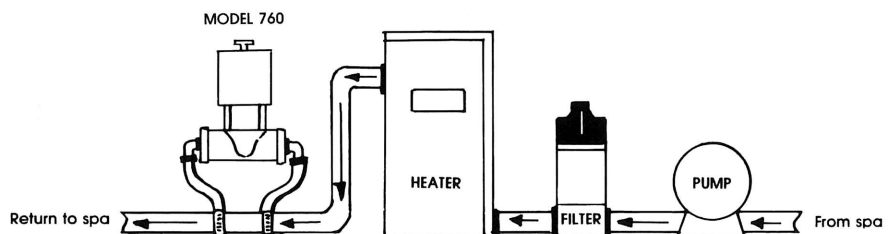

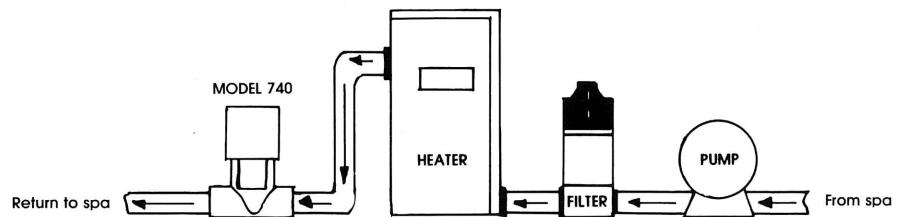

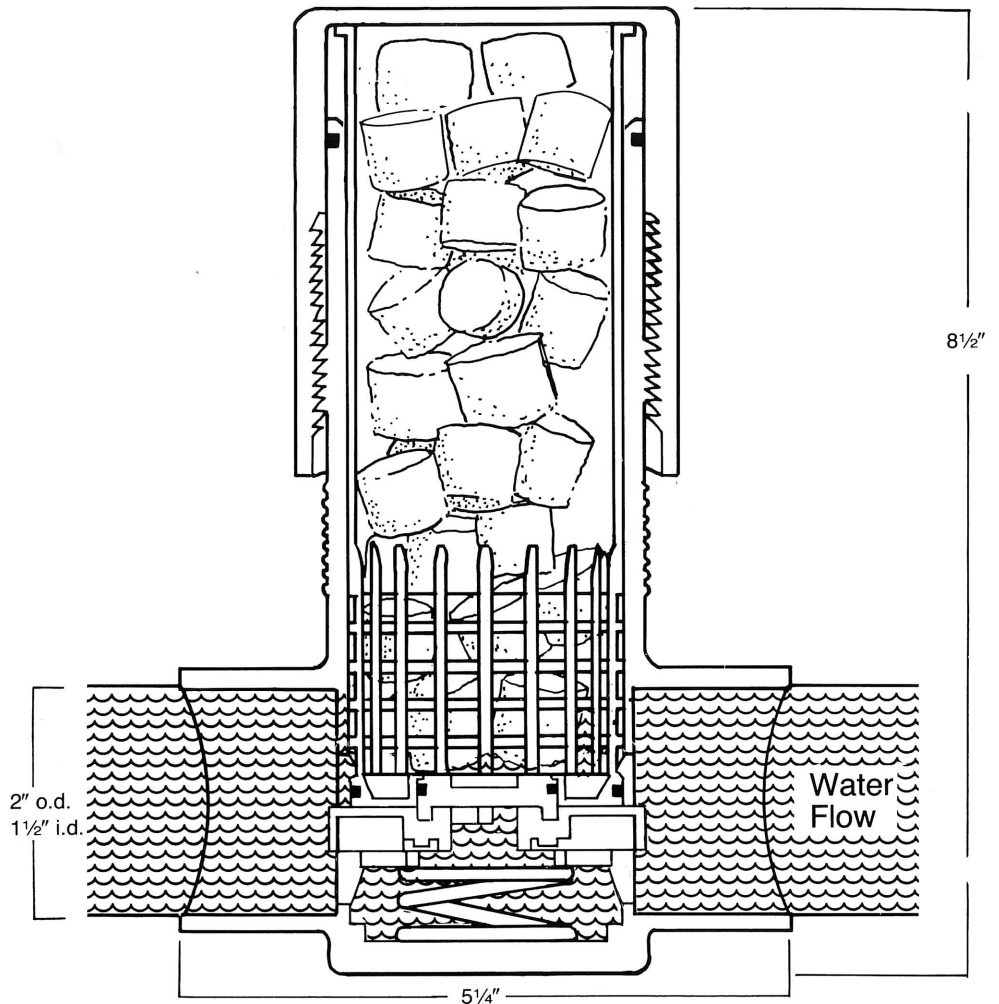

It's easy to install! Installation of the SANI-KING® takes only minutes. Simply cut the return line and cement the housing in place and the SANI-KING® is ready for operation. There's no confusion — the uni-direction feature lets you install it with water flow in either direction.

REASON 4

It's easy to use! Because bromine comes in tablets or sticks, you never have to mix or measure. As an added feature, the SANI-KING® has a self-sealing valve. When you remove the cap to add chemical, it automatically reduces the water flow. This makes the SANI-KING® ideal for use on a portable spa or any spa installation.

REASON 5

It's easy to maintain! Should you ever need to replace any of the internal parts of the SANI-KING®, all you'll need is a screwdriver. A single half-turn will open the basket and allow you to remove the part in need of replacement — without disrupting your entire spa or hot tub system.

Uni-direction installation is a snap. A quality kit allows for easier installation and longer maintenance-free life.

Guarantee

King Technology will guarantee Sani-King® 740 or 760 for one year from date of purchase provided you have the Sani-King® 700 series feeder installed per King Technology's instructions. If Sani-King® 700 series does not feed in accordance with our instruction guidelines, we will either replace or repair the unit at no charge. See limited warranty.

Caution

Sani-King® automatic chemical feeders are designed to use only bromine tablets or sticks, slow dissolving type. Consult your pool or spa dealer for complete information.
