

## Star Floor Kits for Gunite Pools and Spas

Add a touch of the Universe to your Pool or Spa by incorporating Fiber Optic Stars.

We can help you select the right Fiber End glow Cables or Fibers and the Right Lighting source that to produce Spectacular visual effects.

### **Choose the below fiber kit that best describes your design application.**

General design for star effects is using two fibers per Fiber mount every square foot.

When choosing fiber kit include : Additional length of fiber from Light Engine mounting area

Length from conduit to farthest star location

Amount and diameter of conduit stub ups

Fiber is available in 25 individual pre cut cables - 2 strands per jacket cable

One individual pre cut cable of 50, 75,100 or 150 fiber strands per jacket cable.
